

# PATIENT RECRUITMENT REGISTRY

Ensure continuous engagement with patients and caregivers over the course of the patient journey via subscriptions to new trial/site notifications and a broad recruitment registry.

## The Challenge

Choosing a treatment option in clinical trials is usually not a “moment in time” event for patients and caregivers. Over the course of the patient journey, options are continually being re-evaluated as circumstances change. Patient and families want to be informed of new trials and nearby sites that are relevant for their evolving situation. And trial sponsors need a pool of pre-qualified patients when opening a new trial or site. How do you keep patients informed of new relevant treatment opportunities, build out an effective registry of patients for the conditions in your research portfolio, and tap into the patient pool of the dozens of advocacy groups partnered with Carebox?

## How It Works

- 1 Condition-based questionnaires used for pre-screening for a trial can be re-used for future trials for that condition.
- 2 Patients and caregivers consent to notification of new relevant trials/sites and become part of your proprietary recruitment registry.
- 3 The Carebox Connect Network is a source of shared recruitment registries for the many conditions addressed by our advocacy group partners.
- 4 HCPs and advanced users can subscribe to trial notifications based on comprehensive saved filters.

## Highlights

Tap into the Carebox Connect Network and your own recruitment registry of patients and caregivers that have subscribed to notifications of new relevant trials/sites.

Continuously engage with patients and families as your research portfolio evolves in terms of trials and sites, and as the patient journey unfolds.

Leverage the power of condition-based matching and save eligibility filters to ensure that no potential patient is lost even in there is no immediate fit.

Track patient populations flowing from your campaign / outreach spend to ensure ROI beyond the recruitment objectives of one trials.

# Carebox has engaged, matched and referred patients to clinical trials for over 20 years.

**2M+**

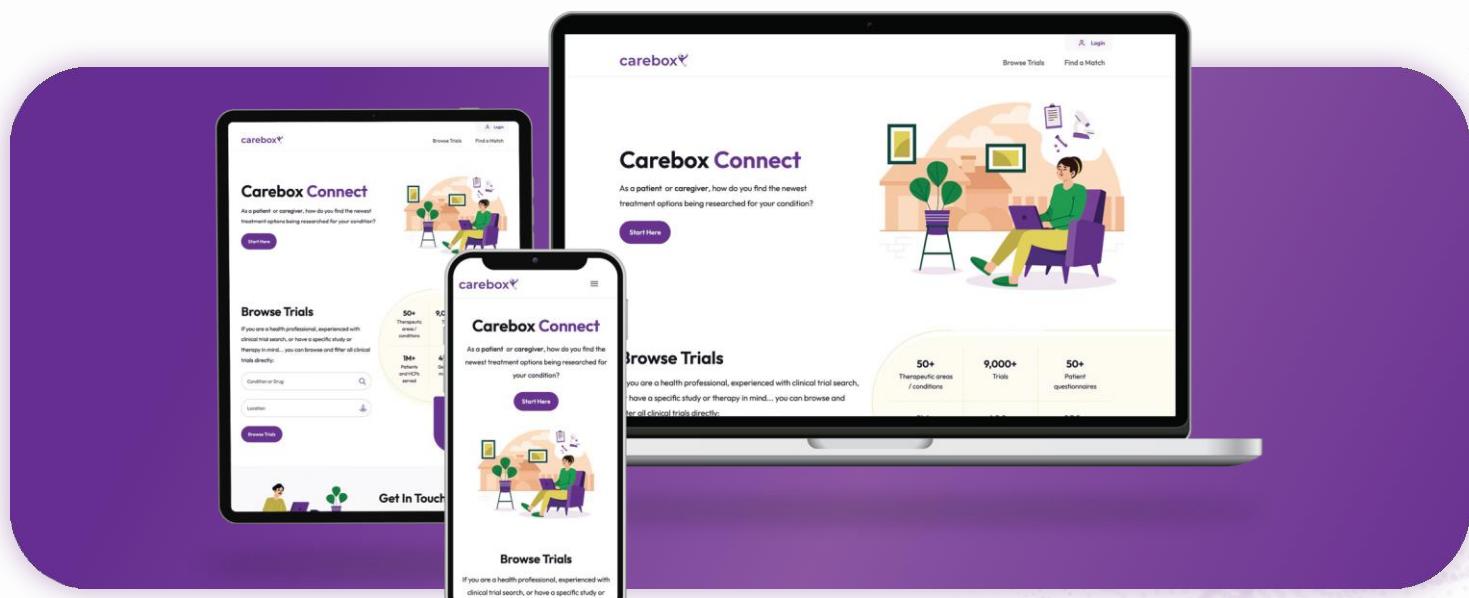

patients, caregivers, and health professionals have used our matching solution to find treatment options in clinical trials.

**250K+**

patients, caregivers & health professional have engaged with our clinical trial navigator call center agents.

**300+**

biotech, pharma, medical centers, advocacy organizations, etc. have implemented the Carebox Connect platform.

## Carebox Connect Solutions

Serving over two million patients and doctors, Carebox Connect powers clinical trial patient engagement, matching/pre-screening, and site referrals for leading pharma companies, research centers, and patient advocacy groups. With unique capabilities available with no other service or platform, scalability from single studies to full portfolios of hundreds of trials, and a wide range of deployment models – there's a Carebox Connect solution for you!
